Thanks to both of you for addressing the admissibility issue. I had reviewed the Motion in Limine; I suppose it makes sense to address that as one of the first orders of business (although I have not as of yet looked at any of the exhibits you all have sent over), although if there is a question about whether the challenged exhibits will even be offered, we might take up the M/Limine if and when the exhibits addressed by the M/Limine are offered.

Dear Judge Starzynski, the plaintiff does not contest the authenticity of any of the defendant's proposed exhibits, and stipulates to the admissibility of exhibits 1-7. Plaintiff objects to the admission of exhibits 8-11 on grounds of relevance.

Pursuant to the recent order Defendant does not contest authenticity of any of Plaintiffs exhibits but reserves all other objections and specifically direct the courts attention to the Motion in Limine filed 6/3/08 dkt no .21 as relates to certain Plaintiffs exhibits considered objectionable by Defendant Simms.

Respectfully submitted

Jennie Deden Behles
